

Clinical Research Associate Position Available Part-Time for one (1) year, renewable

Job Description:

Clinical Research Associate for laboratory of motor control. Fundamental and applied studies are aimed at enhancing arm motor recovery through rehabilitation after brain injury in children (cerebral palsy) and in adults (stroke).

Tasks:

- Recruit patients for participation in research projects;
- Screen patients for eligibility in research projects;
- Perform clinical assessments of patients for research projects;
- Assist in the preparation of documents such as: forms for ethics committee, permissions for access to patient charts, etc;
- Participate in other administrative tasks.

Required Qualifications:

- Be a licensed physical or occupational therapist;
- Have a minimum of one year experience as a clinician;
- Be able to work independently and as part of a team;
- Be able to communicate orally and in writing in English and French.

Locations (Montreal, Quebec):

CRIR (Montreal Center for Interdisciplinary Research in Rehabilitation):

- Institut de réadaptation de Montréal site, 6300 Darlington Ave., Montreal.
- Jewish Rehabilitation Hospital site, 3205, place Alton-Goldbloom, Laval.
- Other referring hospitals in the Montreal area.

Start date: immediate

Salary: hourly rate commensurate with qualifications and experience.
